Lansing, MI – Discover the fascinating features and adaptations of Michigan’s native nocturnal animals with the Organization for Bat Conservation’s “Animal Adaptations” program that will be held at Fenner Nature Center on April 14th from 1:00pm-2:00pm. We will investigate the importance of adaptations, how they are formed and why animals develop these amazing tools for survival. Program attendees will get a chance to meet a live North American owl, flying squirrel and bats. This presentation is sponsored by Michigan based Critter Catchers, Inc.

The cost is FREE for Fenner Conservancy members or \$5 per person for non-members.

Founded in 2005, Critter Catchers, Inc. was formed by David Kugler, an Oakland University graduate holding a Bachelors of Science in Biology, and a Masters Degree in Environmental Engineering from Wayne State University. Critter Catchers provides wildlife control services in southeast Michigan and specializes in humane bat removal and other attic pests. Visit the website at www.crittercatchersinc.com or call 248-432-2712.

For more information, visit Fenner Nature Center on the web at www.mynaturecenter.org. Or call us at 517.483.4224. Fenner Nature Center is located at 2020 E. Mt. Hope Ave., just East of Aurelius Rd. in Lansing.

About Fenner Conservancy: Fenner Conservancy, a 501(c)3 nonprofit organization and managing body for Fenner Nature Center, connects people to nature in the heart of Lansing through conservation, education, and stewardship. Through the efforts of this organization, Fenner Nature Center continues to meet that commitment in difficult times, but Fenner Conservancy needs your help to sustain this crucial part of our community. To explore the many ways you can help support this vital organization, please call 517-755-9799 or visit www.mynaturecenter.org.
