

Nature At Night

Friday, June 8; 7–9 p.m. Lookout Lodge, Waterford Oaks County Park

See some of Michigan's most fascinating nocturnal animals and a flying fox from Aftica at a live animal presentation by the Organization for Bat Conservation. Afterwards, take a walk in search of bats and other nocturnal creatures that are active while we sleep. This program is made possible by a grant from Critter Catchers.

Critter Catchers, Inc. was founded in 2005 by David Kugler, an Oakland University graduate holding a Bachelors of Science in Biology, and a Masters Degree in Environmental Engineering from Wayne State University. A Michigan based company, Critter Catchers provides wildlife control services in southeast Michigan and specializes in humane removal of bats and other attic pests. More information about Critter Catchers can be found at crittercatchersinc.com or 248.432.2712.

The Organization for Bat Conservation is a nationally-recognized local nonprofit agency dedicated to preserving and protecting bats and their habitats.

To register contact Kathleen Dougherty at doughertyk@oakgov.com or call 248.858.0704.
